CW Mill's manufacturing history includes being an early pioneer of what grew into today's grinding industry. CW Mill Equipment Co., Inc. designed and produced some of the earliest grinders to ever come onto the market, the first grinding systems, and today's most advanced grinding machinery.

DynaHog® Screens are your best choice with customized attention to your needs.

- Designed with attention to detail.
- Engineered with experience.
- Constructed of the longest life materials.
- Manufactured by skilled craftsmen.
- Processed by one of CW's computerized precision cutting machines.
- Formed with digital & laser guidance.
- Inspected for quality.
- Shipped fast from our well located factory.
- Delivered to you quickly as the best performing most economical solution.

DynaHog® provides custom made hammer mill screens and grates for All Brands, All Configurations, and All Models of grinders. We can discuss your application, provide options, and work with you to make sure that your custom screen requirements become our standard for you with personal attention to detail.

DynaHog® is your best choice for grinder tips, bits, strikers, and replacement hammer heads.

- DynaHog® products are constructed of the best materials.
- DynaHog® has its own unique blend of carbide called NitroGrit™, which is an available option.

Other options include both Robot & Hand Applied High Performance Wear Resistant Materials. Give us a call for more information about NitroGrit™ and the other wear resistant materials available for your forage hammer mill grinder.

Hammer Mill / Rotor Repair & Balancing

MORE PRODUCTION • MORE EFFICIENT • LESS EXPENSIVE • FAST DELIVERY
